CSCI 373 SENIOR RESEARCH SEMINAR · [TERM AND YEAR]

[Your title: short, accurate, stating your point]

[Your name] · [One line about you] · [How to reach you]

[CSB and SJU logo, from the official file]

MOTIVATION

Why should a visitor care?

[Two or three plain sentences. What problem or opportunity makes this topic matter right now?]

THE ONE THING TO REMEMBER

[Your main finding or claim, in one plain sentence a visitor could repeat to a friend.]

EXPLORATION

What did you build or test?

[Your prototype, benchmark or comparison, and what it showed. Give numbers, not adjectives.]

[Your headline result]

THESIS

What did you commit to?

[Your thesis statement in one sentence: the topic and the scope.]

SCOPE

[Name the real technical content: the algorithms, data or architecture you studied.]

[Your strongest visual goes here]

Your choice: the mental model of your topic, a results chart, an architecture diagram or an annotated screenshot. One large visual beats several small ones. Use a vector or high-resolution image.

YOUR CHOICE

A panel of your own

[Rename this panel for what your project needs: a deep dive, a comparison, limits, or a method.]

1. [First point]
1. [Second point]
1. [Third point]

[One line that sums it up.]

FOUNDATIONS

What must they know first?

[Only the two or three concepts a classmate outside your topic needs to follow the center panel.]

[Optional: a small labeled sketch or chart]

CAPTION THAT STANDS ALONE

[Two or three sentences: what the visual shows, how you produced it, and what the visitor should conclude from it.]

FUTURES

Where is this headed?

[One or two predictions, each with its evidence: data, a trend, a known limit, a model or expert opinion.]

GO DEEPER

[Your QR code]

Scan for the full story

[Full paper]
[90-second video]
[Demo or code]
Or type: [short link]

Sources. [Your three to five key references, or a pointer to the full list behind the QR code.]

AI acknowledgment. [Which tools you used and for what. You own every claim on this poster.]

Thanks. [Instructor, reviewers and others who shaped the work.]
